

**ODS Belgium**, was founded in 2006 and is a subsidiary of ODS Metering Systems since 2018. ODS Metering Systems has its main office in The Netherlands and has branch offices in Dubai, Brazil, Singapore, Saudi Arabia and Belgium. ODS Belgium provides software development (SCADA and PLC), electrical & instrumentation engineering, sampling systems & analyser shelter engineering and construction as well as start-up, service & commissioning.

ODS Belgium is experiencing structural growth and is looking for ambitious people who want to work in a dynamic technical environment.

## Are you our Proposal Engineer?

As Proposal Engineer, you will fulfill a versatile and challenging role in our organisation. Based on client specifications, international standards and common practices, you will compose competitive quotations and will evolve into a role as primary sales contact to our customers. Every project is unique, which will challenge you to rapidly gain experience in metering control systems, analyser systems and metering solutions in general.

Your most important qualities are technical accuracy, clear communication and commercial skills and a wide overall interest in technical solutions.

### The most successful candidate:

- ➔ Knowledge of computer-aided design and drafting software to draft 2D drawings such as P&ID's, System block diagrams, ...
- ➔ Ability to read and interpret customer specifications, mechanical drawings, electrical & instrumentation drawings and control narratives.
- ➔ Good commercial and communicational skills, both written and verbal, in the Dutch and English language.
- ➔ Capable of translating requirements from specifications to cooperate with engineering disciplines and instruction suppliers, in order to identify optimized solutions from a technical and economical point of view.
- ➔ Strong interpersonal and organizational skills.
- ➔ A degree in Master/Bachelor of Industrial Sciences or equivalent through experience.
- ➔ Minimum of 5 years work experience with relevant project experience, ideally in automation, electrical and instrumentation and/or analysers in gas & oil metering projects.

### What we can offer you:

- ➔ Grow your talents by challenging international Metering Projects in the Oil & Gas industry.
- ➔ Join an inspiring team of engineers with different backgrounds and seniority levels.
- ➔ Working in a people-oriented company with an informal working environment.
- ➔ A motivating salary, with extra-legal benefits and company car.
